PCB Engineering Services

*Advanced Designs
for Printed Circuit Boards*

*We are pleased to provide quality and cost effective
solutions to meet your engineering needs.*

Expertise in Printed Circuit Design

From concept to finished product, *IST Engineering Services* will provide a cost effective solution to meet your requirements. We are committed to providing your organization with the highest level of professional service available.

We specialize in assisting the R&D effort by maintaining close communication with our customers throughout the design process.

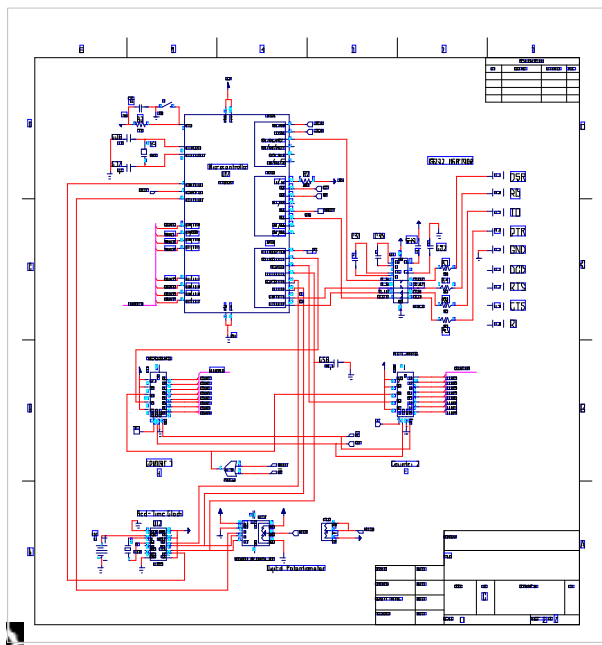

From schematic capture to preliminary parts placement and final routing, we will provide check plots and all necessary documentation to keep you apprised of our progress.

Utilizing the most advanced design tools available, we can produce designs, which incorporate the latest technologies in your high speed, high density, and multilayer PC boards.

IST Engineering Services can provide management of your projects. From schematic to finished product we have the expertise to get the job done.

With over 15 years of experience in microelectronics, PCB design and manufacturing we are capable of managing all aspects of your project.

Design Excellence and Customer Satisfaction are our continuing goals.

- **Schematic Capture**
OrCAD™
DxDesigner™
PADS PowerLogic™
Mentor Graphics Design Capture™
- **Printed Circuit Layout Design**
PADS PowerPCB™
Mentor Graphics Expedition™
- **Reverse Engineering**
CAM350™
Gerber to PADS PowerPCB
Bit map to Vector Conversion
- **Mechanical Design**
AutoCAD™
SolidWorks™
- **Component Sourcing**
Component Management Systems
PCB Navigator™
- **Project Engineering / Management**
eProduct Designer™
Visio™
